

ABSTRACT OF THE DISCLOSURE

There is provided a liquid-crystal display device having  
a transmission type liquid-crystal display panel including a  
liquid-crystal cell, a light source disposed on at least one  
5 side surface of the liquid-crystal display panel, and an optical  
path changing sheet disposed on a back side opposite to a visual  
side of the liquid-crystal display panel and having optical  
path changing slopes. Incident light from the light source  
is reflected toward the visual side of the liquid-crystal display  
10 device.
